UPPER KEYS

This is the third time in thirteen years that Literacy Volunteers of America (LVA) has appealed to the public for financial support. We are only asking because we truly need your help. Please help continue our mission:

We believe the ability to read, write and communicate in English is critical to personal freedom.

Since 1984, we have helped more than 4,000 students achieve personal goals through increased literacy skills. Our students' goals include improving reading and writing skills, acquiring English communication skills, better employment opportunities, registering to vote, obtaining a driver's license and/or U.S. Citizenship and achieving self sufficiency. Last year, 80 tutors and teachers helped 200 students improve reading, writing and English literacy skills. Our students become more effective employees for many of the businesses in Monroe County.

Every tax deductible contribution you make goes to support the students. We are the grateful recipients of donated classroom space. Our tutors volunteer their time. Your donation pays to train our tutors, keep our office open for students and purchase the books, notebooks, dictionaries and creative materials we use. Please help.
